WIC Kids. Love them. Immunize them!

Immunizations: How is your child doing?

Dear Parent,
Today we checked _____'s Immunization Record. Information below tells how your child is doing:

☐ **Congratulations!!**
Your child is up-to-date on DTaP shots at this age. Please call your doctor or clinic to see when the next shots are due.

☐ Your child may be due for more immunizations because one or more doses of the DTaP vaccine are missing from the shot record.
Please call your child's health care provider today to see if the doctor wants your child to come in for immunizations.

Dear Health Care Provider: This child's parent/guardian provided his/her Immunization Record or other documented immunization record to the WIC program for review. WIC staff reviewed the DTaP doses *only*. Based on the review, the parent was asked to telephone you to determine if you want the child to come in for immunizations now or, if you believe that immunizations are not needed now, the date the child should come in for her or his next immunizations. We hope that this information will assist you in your care of this patient. Please call us if you have questions or need further information.
