This is a selected bibliography and not necessarily meant to be comprehensive. Revised editions of this bibliography will be made available at future SSP meetings (and through the L.S.I.G. Bibliography Service) as changes and additions warrant. Therefore, corrections and suggestions of additional titles that might be added to this bibliography are welcomed. There is one special requirement for inclusion in this bibliography: the bibliographer requires a complete text of the article under consideration, since he hopes to eventually index and annotate this bibliography. Foreign language articles are encouraged, as long as the full article is submitted.
